

Field Merchandiser (Zoom)

Objective

As a Field Representative, your task will be to maximize sales of our clients' products by visiting assigned stores on a weekly basis and ensuring product is loaded into the machine. Store call consists of: picking up product as pre-designated UPS center, transporting product to machine, placing product in machine, processing returns via UPS center if necessary, cleaning machine, updating signage, and changing printer paper when necessary. This position will also have an ON CALL tech support element to it. Tasks will include light technical work.

Essential Functions:

- Must meet and greet store management with a professional and positive attitude
- Be appropriately dressed, and available to answer questions and develop store-level relationships with store personnel
- Displaying new releases, promotional material, replenishment of product, conduct audits, place Point of Purchase (POP) materials.
- Ensure that the product is in accordance with the Plan-o-gram.
- If employee meets requirements, they may be eligible for a PDA request.

Qualifications / Requirements:

- Have retail and/or merchandising experience
- Must have valid/active e-mail address with ability to report completions via the web on the day of service.
- Must be able to work flexible hours, nights and weekends and able to respond to a dispatch at a moments notice.
- Must be able to stand, bend, climb, stoop, kneel, stretch and lift up to 40 pounds
- Must be able to use step ladder, dolly and basic tool set (screwdriver)
- Complete work within assigned service window
- Must be able to read Plan-o-grams
- Reliable transportation. Vehicle must be secure and large enough to transport a number of shipping boxes.
- Proof of Auto Insurance and Valid Drivers license
- Must be bondable and pass a criminal and DMV background check.
- Check e-mail daily
- Fax & Printer
- Digital Camera (not required, put a plus)

Education/Experience:

- High School Diploma or GED

ENVIRONMENT

- Varies, depends on climate. Most duties are performed in field environment
